

BICSI Credential Renewal Information

BICSI views learning as a life-long endeavor and places an emphasis upon continuing education as part of maintaining credentials and certifications. Within each three-year registration period (after the exam is passed), all credential holders must obtain BICSI offered or approved continuing education credits (CECs). These CECs must be of a technical nature and directly related to the particular area of specialty within the ITS industry. Credential holders must complete this requirement in order to renew their credential.

Renewal Requirements:

- **Registered Communications Distribution Designer (RCDD)**
45 CECs and attendance at least one BICSI conference during the three-year period is mandatory.
- **Registered Information Technology Professional (RITP)**
45 CECs and attendance at least one BICSI conference during the three-year period is mandatory.
- **Registered Telecommunications Project Manager (RTPM)**
36 CECs in ITS- or safety-related training.
- **Data Center Design Consultant (DCDC)**
24 CECs of DCDC-specific training.
- **Electronic Safety and Security (ESS) Designer**
36 CECs of ESS-specific training.
- **Network Technology Systems (NTS) Designer**
36 CECs of network-specific training.
- **Outside Plant (OSP) Designer**
24 hours of OSP-specific training.
- **Wireless Designer (WD)**
36 CECs of wireless-specific training.
- **ITS Installer 2**
15 CECs and proof of current installation activity. Individuals with the ITS Installer 2 credential are required to complete the *On-the-Job Training (OJT) Booklet* within the first three-year registration period.
- **ITS Installer 2, Copper**
15 CECs and proof of current installation activity. Individuals with the ITS Installer 2, Copper credential are required to complete the *On-the-Job Training (OJT) Booklet* within the first three-year registration period.
- **ITS Installer 2, Optical Fiber**
15 CECs and proof of current installation activity. Individuals with the ITS Installer 2, Optical Fiber credential are required to complete the *On-the-Job Training (OJT) Booklet* within the first three-year registration period.
- **ITS Technician**
18 CECs and proof of current installation activity. Individuals with the Technician credential are required to complete the *On-the-Job Training (OJT) Booklet* within the first three-year registration period.
